

Resume of

Chibuikem Emmanuel Victor

FullStack Engineer (MERN), Project manager, IT Technical Support, Web Instructor

I am a Proficient Fullstack Engineer specializing in HTML, CSS, Javascript, Reactjs, Nodejs, Python/Django and in depth knowledge in databases like PostgreSQL and other relational and non-relational databases with great experience in designing and developing scalable web applications and creating responsive and dynamic user interfaces and an exemplary team player. Providing technical support for hardware and software, skills that build right for APIs, implementing secure authentication and optimizing database performance. Passionate about solving complex problems, collaborating with cross-functional teams, and delivering user-centric solutions. Eager to contribute technical expertise and innovative ideas to drive successful project outcomes.

Experience

Globaltech Computer Institute, Nigeria — *Designer/IT-technical support/web developer*

MARCH 2018 - JANUARY 2020

- Graduated from this institute with a web design certificate
- Assisted in **training students** in web development technologies such as HTML, CSS, Javascript and Python.
- Assisted in building different user interfaces with students for easy comprehension.
- Provided technical support for hardware and software issues, diagnosing and resolving system faults to ensure minimal downtime for staff.
- Installed, configured, and maintained computer systems, including operating systems, applications, and peripheral devices.
- Assisted in troubleshooting network-related issues and ensuring stable connectivity across workstations.

Fidelcom Innovation Limited, Nigeria — *Internship*

2022 - 2023

- Worked as a junior web developer in developing web application projects.
- Collaborated with a senior developer to build an architectural website with Technologies like HTML, CS, Javascript, Python/Django and was deployed
- Conduct **code reviews** to maintain coding standards, optimize performance, and ensure seamless integration with backend systems.
- Establish and enforce workflows for **version control (Git/GitHub)** and CI/CD pipelines to streamline development and deployment processes.
- Implement performance monitoring and optimization strategies to enhance **frontend application speed and user experience**.
- Facilitate **knowledge-sharing sessions** and team-building activities to foster a collaborative and growth-oriented work environment.

WYNK, Nigeria — *Junior developer*

2024 - 2025

- Collaborated with cross-functional teams including backend developers, designers, and product managers to deliver responsive and scalable web applications and translate business requirements such as WYNK's product into scalable solutions.
- Collaborated with an UI/UX designer to build two NGO web apps.
- Heavily involved in building a financial product

LOCTECH, Nigeria — *Web dev Instructor*

2025

- Trained and mentored up to 20 students in core web technologies including HTML, CSS, JavaScript, Tailwind CSS, Python, and Django, ensuring a solid foundation in both frontend and backend development.
- Designed and delivered structured, hands-on training programs with real-world projects, guiding students from beginner level to building fully functional web applications.
- Supervised student progress from onboarding to graduation, providing continuous support, code reviews, and practical problem-solving sessions to enhance their technical and professional skills.

Pinnacle Institute, Nigeria —Project Management Professional (PMP) Certification

2024 - 2026

- Trained in project planning, risk management, execution, monitoring, and delivery methodologies

Projects

An Architectural Web Application(KONS), Nigeria — *Live*

- An architectural web app enabling users to contact an architectural company for their building project.
- Worked with a senior developer enabling timely delivering and clean scalable code
- Facilitated peer code reviews and introduced reusable component patterns.
- The project has a backend functionality of user authentication and authorization and an admin access feature facilitating proper database management using SQLite.

An NGO Website(Ibeafiya)

- Built Ibeafiya for community assistance - a platform to assist indigenes and her committees for better living and donations.
- Designed and developed the full application using HTML, CSS and Javascript
- Focused on clean UI/UX, responsive layouts, and scalable architecture

A Frontend E-commerce Application

- A platform for buying and selling
- Built with HTML, CSS and Javascript

A Todo App

- A platform for users to keep track of their task by creating, deleting, updating their tasks
- Designed and developed the full application using React, Tailwind CSS and Python/Django

Education

Bachelor's Computer Science, Nigeria — *Abia State University*

NOVEMBER 2019 - MAY 2024

GlobalTech Computer Institute, Nigeria — *Web Programmer*

NOVEMBER 2019 - MAY 2024

Pinnacle Institute, Nigeria — *Project management certified*

NOVEMBER 2024 - MAY 2026

Skills

HTML, Vanilla CSS, Tailwind CSS, Vanilla Javascript, React, Microsoft Excel, Python, Nodejs, Django, JWT, Git & GitHub, [Socket.io](https://socket.io/), Context API, Material UI, Typescript, SEO optimization, PostgreSQL, Strong communication skill, proficient in using AI tools such as gemini, ChatGPT, windsurf and deepseek, Microsoft Project,

Tools

Visual Studio code(VS code), Sublime text, GitHub, Postman, Trello, Tomcat, Jenkins,Microsoft Teams – Team communication and meetings

Slack – Real-time collaboration and messaging

Zoom – Virtual meetings and stakeholder engagement

Google Workspace (Docs, Sheets, Drive)
